

Grey Breeding Fell Ponies: USA & Canada

In North America, from 2017-2023, there were 23 grey Fell ponies out of the 176 total Fell breeding ponies. Since grey is dominant, we can look at a grey pony's pedigree and easily see the bloodline pathway that carried down the grey gene. Interestingly, the grey line of all 23 go back to Mountain Flash II via 3 of his progeny: Adamthwaite Dawn, Greenholme Delight, and Townend Mandy. Below is a breakdown of the 23 contributors according to the bloodline they share.

Shared grey pony line.

NA Grey Pony Producers 2017-2023
